Weston, May 23. — On last Tuesday about 7:15 A. M. Mrs. Henry Lockhart, of Weston, gave birth to a seven pound boy baby, well formed and apparently healthy, but on the evening of the same day Dr. M. S. Holt, the attending physician, was informed that the haby was mucous. After cleaning out the mouth considerable relet and the easy would rest and breathe perfectly easy for a time, and when the bottle would be given to it it would show signs of great hunger, holding to the ripple and drawing the milk until it would flow from its nese and the

ing to the supple and crawing the mile until it would flow from its nose and the sides of its mouth.

That morning Mrs. Lockhart informed the physician that in the month of last November or December, she went to the back door of the house and heard a dying hog that was being butchered suffocating, which made such an impression on her mind that site for sometime afterwards saw in her mind's eye a hog with its throat cut. She said that the moment she heard the child breathe it reminded her of what had occurred last fall.

On Sanday evening about 5 o'clock the child thed, and Dr. Holt, assisted by Drs. J. S. Lewis and C. C. Hersman, made a postnortem examination, which revealed that the cosphagus, or awallow, was sovered at the point of the third rib and had grown over, and at a distance of one-hall neck from that noint it commenced again.

nch from that point it comm with that part grown over and was per-fectly developed down into the stomach. There was nothing abnormal about the rest of the internal vicera of the child, and there can hardly be a shadow of doubt but what the impression made upon the mother by that nog with its throat cut, arrested the proper development of the focus.
